ECOSOFT

Batch and cycle documention of sterile processing

According to national directives and guidelines, the operator in charge of sterile processing must be able to provide evidence that medical devices have been duly processed.
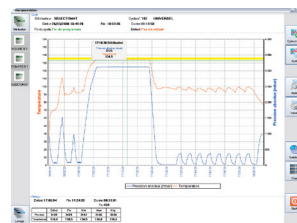

The simply way of documentation

ECOSOFT is a software made by MMM to support your documentation tasks of sterile processing. ECOSOFT both records the cycle data of machine processes and manages the whereabouts of the sterile goods. ECOSOFT is at your side throughout the processing cycle of medical devices recording every individual step of the cycle.

Return of medical devices

Washing and disinfection

Checking and packaging

Sterilization

Release

Despatch to operating theatres and wards (including patient reference)

All machines used in CSSD, such as washer-disinfectors, heat sealing machines or sterilizers can be directly connected to ECOSOFT. Machine process data are transferred to ECOSOFT and allocated to the packing data of each set. Upon cycle end a batch protocol is automatically created and archived together with the set data.

ECOSOFT provides SAFETY.

MMM.
Protecting human health.

User friendly

- With just a few inputs to successful documentation
- Easy handling
- Intuitive menu navigation
- Cost transparency by just a mouse click

Quality assurance

ECOSOFT supports the reproducibility of processes: A description and a picture of each set is recorded in ECOSOFT. This helps the personnel in the packing area to assemble the sets correctly thus delivering invariable good quality.

Transparency

The statistics module of ECOSOFT is a very efficient tool to deliver cost transparency. Data evaluation offers valuable clues to:
- The costs involved
- WHO, WHAT, WHEN, HOW
- The number of processing of an instrument
- The current whereabouts of an instrument
- The current status of an instrument

Individual

ECOSOFT is adaptable to your individual needs.
- Single work station application
- Multi-work station application
- Multi-client application
- Multi-lingual version

ECOSOFT Reliable – Easy – Tailored to your needs
